SKILLS

Environment

- VS Code
- Emmet
- Prettier
- NPM
- CLI/Git Bash
- Git/Github
- React Dev Tools
- Google Lighthouse

Front-end

- HTML5
- CSS3/Sass
- JavaScript (ES6+)
- TypeScript
- React.js
- JSX
- Next.js
- Gsap

Back-end

- Node
- Express
- Mongoose
- MongoDB

Design Tools

- Experience Design (Xd)
- Photoshop
- Illustrator
- InDesign

PROFILE

I am self-motivated with a "can do" attitude and love learning new technologies. As an analytical thinker, I can identify and define problems and develop workable solutions.

Over several years, I've dedicated much of my free time to gaining proficiency in several front-end technologies and design tools, together with some back-end knowledge.

My development process is meticulous, following fundamental design principles: "keep it simple, stupid" (KISS), "don't repeat yourself" (DRY), simple navigation, visual hierarchy, consistency, etc.

My interest has been React-focused predominantly since late 2020, with several small - mid-sized projects now complete.

I aim to transition into a full-time commercial development role - while continuing to learn and build upon the knowledge and skills already attained.

RECENT PROJECTS

Star Wars   Oct 2022

Explore the galaxy! Discover films, people, species, planets, starships and vehicles from the first seven (at the time of writing) films. Features include infinite data loading on scroll, data caching via React Query and bespoke (not included with data) imagery. Utilising a simple and somewhat familiar API - this project was an opportunity to practice and develop my understanding of TypeScript after recently taking my first steps with it.

Technologies

Portfolio v2   Mar 2022

Summarizing my current knowledge, skills, preferences and intentions - while providing a convenient way to view my latest work live and take a peek behind the scenes.

Technologies

Games   Nov 2021

Search and explore 500,000+ games for 50 platforms - including mobiles. Containing comprehensive video game data - courtesy of RAWG: videos, screenshots, descriptions, genres, ERSB ratings, Metacritic ratings and more... Additional features include optional infinite scrolling and a light or dark theme.

Technologies

The Weather   Mar 2021

Check the forecast where you are - using Geolocation. Alternatively, perform manual searches - elsewhere! Forecasts include conditions, precipitation and wind (displayed hourly) in a format that suits you. The presentation includes dynamic imagery, courtesy of Unsplash - which matches (somewhat reliably) current weather conditions.
